

DARRSHAN ERETTAI MUNIANDY

Cybersecurity Analyst

Bandar Putera, Klang, Selangor | +60 13-976 0509 | darrshan2003@gmail.com | [Website](#)

SUMMARY

Cybersecurity Analyst with hands-on SOC experience across multi-client SIEM/XDR monitoring, threat triage, DDoS mitigation, and incident escalation in high-availability environments. Skilled in validating alerts and coordinating with clients and incident response teams to meet strict SLAs. Combines a Bachelor's in Computer Science (Cybersecurity) with practical exposure to Splunk, Google SecOps, Trend Micro, Stellar Cyber, and QRadar, plus full-stack development experience supporting security tooling and automation.

WORK EXPERIENCE

Accenture

Apr 2026 - Present

Cybersecurity Analyst

Exchange 106, TRX, Kuala Lumpur

- **Multi-Client SOC Operations:** Concurrently monitor and triage security alerts across three enterprise clients, using Splunk ES, Google SecOps SOAR, Trend Micro Vision One, and Trend Micro Deep Security to validate activity and escalate confirmed incidents to IR teams and end users.
- **Threat Containment & Tuning:** Block confirmed malicious items on SO and manage exception requests within Detection Model Management to keep detection rules accurate and reduce false positives.
- **Client & Team Coordination:** Participate in bi-weekly client cadence calls and contribute to the MSS monthly report to align on security posture and open concerns; join weekly team standups to maintain continuity across shifts.
- **Security Reporting:** Compile monthly reports covering license utilization, non-reporting device summaries, and newly created alerts/use cases for clients.
- **Endpoint & Infrastructure Defense:** Run malware scans, isolate or collect files from compromised endpoints for investigation, and monitor critical servers, firewalls, and Windows devices, performing remote Splunk restarts when required.
- **Automation:** Built a Python tool using the VirusTotal API to automate bulk domain-reputation checks, exporting results to Excel to speed up triage.
- **Tech Stack:** Splunk ES, Google SecOps SOAR, Trend Micro Vision One, Trend Micro Deep Security, Trend Micro Deep Discovery Inspector, Trend Micro Deep Discovery Analyzer, Microsoft Azure, ServiceNow.

TimedotCom

Aug 2025 - Nov 2025

Cybersecurity Analyst, Intern

Shah Alam, Selangor

- **SIEM Monitoring & Incident Triage:** Monitored SIEM alerts to detect potential threats, creating tickets for all offenses and escalating validated incidents to L2 analysts or customers for verification.
- **DDoS Response & Communication:** Managed DDoS incident protocols by issuing timely notifications to customers via email or phone based on attack duration (≥ 10 mins) and Service Level Agreements (SLAs), ensuring every alert was documented in the ticketing system.
- **Operational Support & Reporting:** Assisted in the preparation of monthly security reports and maintained accurate operational data using Excel.
- **Platform Proficiency:** Gained hands-on training in Stellar Cyber Open XDR and PRE Security AI SOC to support offense management and analysis.

Mr Digital

Dec 2023 - Aug 2025

Website Developer, Freelance

- **Full-Stack Development:** Developed custom, responsive websites from concept to deployment, handling both front-end interfaces and back-end functionality.
- **Client Management:** Collaborated directly with clients to translate their specific requirements into functional digital solutions.

EDUCATION

Swinburne University of Technology, Australia

Feb 2023 - Dec 2025

Bachelor of Computer Science, major in Cybersecurity | CGPA 3.5 MY / 2.75 AUS

Subang | Australia

INTI International College, Subang

Jan 2022 - Dec 2022

Foundation in IT | CGPA 3.3

Subang

CERTIFICATIONS & LICENSES

- Certified Cybersecurity Technician, EC-Council, Jan 2026
- Certified in Cybersecurity, ISC2, Dec 2025
- Cybersecurity Awareness: Cybersecurity Terminology, LinkedIn, Nov 2025
- Stellar Cyber SOC Analyst Associate, Stellar Cyber, Nov 2025

- Microsoft Security Essentials Professional Certificate, Microsoft, Oct 2025
- Microsoft Security Essentials: Concepts, Solutions, and AI-Powered Protection, LinkedIn, Oct 2025
- SIEM: Event Management with Splunk Security, LinkedIn, Oct 2025
- AWS x INTI Ideathon, AWS, May 2025
- Fortinet FortiGate 7.4 Operator, Fortinet, Apr 2025
- Fortinet Certified Associate in Cybersecurity, Fortinet, Apr 2025
- Network Security, Cisco, Jan 2025
- ISC2 Candidate, ISC2, Dec 2024
- Linux Unhatched, Cisco, Dec 2024
- CCNA: Enterprise Networking, Security, and Automation, Cisco, Aug 2024
- CCNAv7: Switching, Routing, and Wireless Essentials, Cisco, Aug 2024
- CCNA: Introduction to Networks, Cisco, Jan 2024

SKILLS

Security Tools & Platforms: IBM QRadar, Arbor DDoS, Stellar Cyber Open XDR, PRE Security AI SecOPS, Trend Micro Vision One, Google SecOps, Splunk ES, Cacti, Nmap, Kali Linux, Parrot OS

Security Operations & Analysis: SIEM, Extended Detection & Response (XDR), Incident Response, Log Analysis, Digital Forensics & Evidence Handling, MITRE ATT&CK TTPs, Offense Management & Escalations, Email Quarantine Analysis

Networking & Infrastructure: Routing & Switching, Cisco Switches, Network Administration, IPSec VPN, Site-to-Site VPN, NAT & PAT, AWS EC2, Windows Server, Active Directory (AD), Docker

Programming & Development: Python, C++, C#, Ruby, HTML, CSS, JavaScript, SQL, PHP, Flask, Data Structures & Algorithms, Object-Oriented Programming (OOP)

Databases & Platforms: PostgreSQL, MySQL, Supabase, Thingsboard, WordPress, Wix

Productivity & Software: Microsoft Word, Excel, PowerPoint, Access, Data Visualization, Generative AI, Web Development, Ticketing Systems

Professional Skills: Report Writing, Social Engineering, Communication, Teamwork

PROJECTS

- Go-HIDS: Real-Time Host Intrusion Detection Agent** Jan 2026
- **Overview:** A production-grade security agent built in Go, leveraging Goroutines for concurrent, non-blocking log analysis.
 - **Detection Engine:** Regex-based detection engine identifying IOCs including SSH Brute Force (MITRE T1110) and privilege escalation patterns.
 - **Alerting Pipeline:** Automated alerting pipeline that parses raw logs into structured JSON and triggers instant webhook notifications for analysts.
 - **Tech Stack:** Go, Goroutines, Regex, MITRE ATT&CK, Webhook.
- Web Exploitation & Pen Testing Lab** Jan 2026
- **Overview:** Virtualized testing environment simulating real-world web application vulnerabilities using Kali Linux.
 - **Attack Simulation:** Executed MITM attacks, directory scanning, and credential harvesting using WebSploit.
 - **Defensive Analysis:** Analyzed generated attack traffic to identify detection patterns and improve threat hunting.
 - **Tech Stack:** Kali Linux, WebSploit, MITM, Pen Testing.
- Personal Mini SIEM Ecosystem** Self-Directed Lab
- **Overview:** Localized SIEM system built to actively ingest, parse, and monitor operational telemetry end-to-end.
 - **Detection Engineering:** Continuous monitoring with fine-tuned alert thresholds for advanced detection engineering.
 - **SOC Practice:** Practice ground for real-world SOC workflows and log correlation techniques.
 - **Tech Stack:** Wazuh, Log Correlation, Detection Engineering.
- IoT Obstacle Avoidance Car** Apr 2025
- **Autonomous Navigation:** Built an autonomous car capable of detecting and avoiding obstacles in real time.
 - **Hardware Integration:** Programmed microcontrollers using Arduino and integrated Raspberry Pi for processing.
 - **Sensor Programming:** Utilized Python for sensor data handling and motion control.
 - **Applied IoT:** Applied IoT concepts and hardware-software integration for practical robotics.
